# TTAD Emergency Preparedness

## INTRODUCTION

The FAA has issued a comprehensive (almost 300 page) advisory circular [AC 150/5200-31C AIRPORT EMERGENCY PLAN](#) which “provides guidance to the airport operator in the development and implementation of an Airport Emergency Plan (AEP). The AEP addresses essential emergency related and deliberate actions planned to ensure the safety of and emergency services for the airport populace and the community in which the airport is located”. This directs the airport to develop an AEP. We suggest that the community would be well served by the airport if The District expanded the scope of its reach beyond aviation related emergencies and be ready to support more serious regional emergencies. While we could speculate on what these emergencies could be it seems better to maintain flexibility to support emergencies that may not have been explicitly considered.

The District is relatively isolated and, as such, has developed a robust emergency preparedness plan with multiple agencies working together to test and implement this plan.

## ON-AIRPORT AVIATION INCIDENTS

Since 1/1/1982 (just over 30 years) there have been 87 recorded incidents, 16 involving fatalities, involving Truckee on the NTSB aviation incident database. In addition 3 more were assigned to Tahoe City

## COMMUNICATION PLAN

### FACILITY PLAN

### AIR SHOW PLAN

Victor Hernandez is on the organizing committee and develops a rigorous plan to support the air show. Each year The District, via the air show committee, funds additions to Mr. Hernandez team’s inventory of supplies. His team supports many events in the region.

## OFF-AIRPORT AVIATION INCIDENTS

While aviation incidents within The District may not be directly related to operations at the airport the general population still look to the airport as a source for information and response for aviation incidents.

## COMMUNICATION PLAN

### FACILITY PLAN

## REGIONAL INCIDENTS

The airport is a large facility with obvious utility to stage response teams. These response teams can be self-supporting but community benefit would accrue if the airport could provide infrastructure to support these teams so they can ‘stand up’ more quickly and remain on-station longer.

# TTAD Emergency Preparedness

## COMMUNICATION PLAN

## FACILITY PLAN

## RECOMMENDATIONS

Develop the Airport Emergency Plan (AEP) to the level required by FAA for Part 139 airports. Note the relevant FAA AEP Circular [AC 150/5200-31C](#) does not explicitly identify Fires or Blizzards as natural disasters. Unicom already has a well tested checklist to deal with an aviation related incident, and the airshow has a comprehensive plan.

Enable the airport to be used as an evacuation point

- Provide space for a cache of shelf-stable emergency supplies to be managed by Placer and/or Nevada County Sheriff's Office (and Red Cross)  
If MRE/HDRs are part of the cache then the building must maintain a steady, cool, temperature to maximize the shelf-life of the MRE/HDRs and this inventory must be replaced periodically.
- Inventory of assets available to be leveraged during an emergency
- Infrastructure design for Emergency Response Teams/Evacuation Center
  - Potable water supply
  - Power
  - Lavatory
  - Information/entertainment
  - Garbage
- Signage to create separation of emergency responders from those coming to an evacuation point
- Consolidated cross-jurisdiction EOC (without political overhead)
- Addendum to hanger leases to enable them to be temporarily vacated at the discretion of the airport manager and made available for non-aviation use during a formal Governor announced State of Emergency
- Enable evacuees to bring pets

Enhance the AEP to reserve a location for a mobile fire retardant plant close to a large water supply and easily accessible by helicopters.

## CONCLUSIONS

# TTAD Emergency Preparedness

## APPENDIX A: INCIDENTS AND ACCIDENTS IN TRUCKEE

Accident No.	Event Date	Location	Injury	Make	Model	Phase of Flight
WPR14CA292	07/13/2014	Truckee, CA	Non-Fatal	JONKER SAILPLANES (PTY)	JS1-C	APPROACH
