ACAT SUBCOMMITTEE REPORT AWOS WEATHER STATION ON SUMMIT

• • •

Tom Combs

Chis Gage

Leigh Golden

The subcommittee has completed most of the initial research for a preliminary recommendation to the Airport Board. We are awaiting a letter of endorsement from the Reno NWS, and a detailed "Gate Penetration" report from Mike Cooke. Initial site location research has been completed, a very rough estimate of installation costs has been obtained, and some of the challenges we might expect have been researched.

It is anticipated that a report for both ACAT and the Board's review will be ready within 45 days.
