Detail of the District's holdings this quarter end appears in the following table:

Type of Investment	Interest (Coupon Rate)	Amount	Maturity	9/30/2016 Mkt Val	Rating

Ally Bank CD	1.25%	\$ 250,000	2/5/2018	\$ 251,426	FDIC Insured
Wells Fargo Bank NA	1.15%	\$ 250,000	7/22/2019	\$ 250,340	FDIC Insured

C. The return on the District's investment portfolio expressed as an annual percentage rate.

For this quarter end, the return on the portfolio is 0.63% (annualized). This is calculated based on the LAIF rate for this quarter and assumes the CDs will be held until maturity.

D. The weighted average maturity of the District's portfolio.

The portfolio's maturities can be broken down as follows:

Maturity Range	Policy Instruction 308	
	Suggested %	Actual %
One day to 180 days	10% to 50%	88.63%
181 days to 360 days	10% to 30%	5.68%
One year to two years	10% to 20%	2.84%
Two years to three years	0 to 20%	2.84%
Over three years	Requires Board Authorization	

The District has not been more aggressive in pursuing longer maturity investments because the return (yield) on a longer maturity investment is not sufficiently greater than the return earned with LAIF to justify the risk. The current weighted average maturity of the portfolio is 65 days.

E. A statement of compliance with investment policy.

The investment policy's objective is to protect the District's investable assets and generate income to the extent that prudent money management practices allow. Ideally, the District will invest in a variety of investment vehicles to increase the yield/return on investment received, while balancing the risk factors present. Although the suggested percentages of investments within the maturity ranges in the policy are not currently met, the weighted average maturity is within the stated limit and the District is in compliance with the policy.

F. A statement that the projected cash flow is adequate to meet expected obligations of the District over the next six months.

As a majority of funds are currently invested with LAIF and the weighted average maturity is 65 days; the projected cash flow is adequate to meet the expected obligations over the next six months.
