Agenda

- 00 AM Call to Order
- 10 AM Introductions of Staff, ACAT, and Board
- 15 AM Existing ACAT Work Plan Introduction and Questions
- 0:00 AM Additional Items for Consideration
- 0:45 AM Summary of Next Steps
- 1:00 AM Adjourn

Project

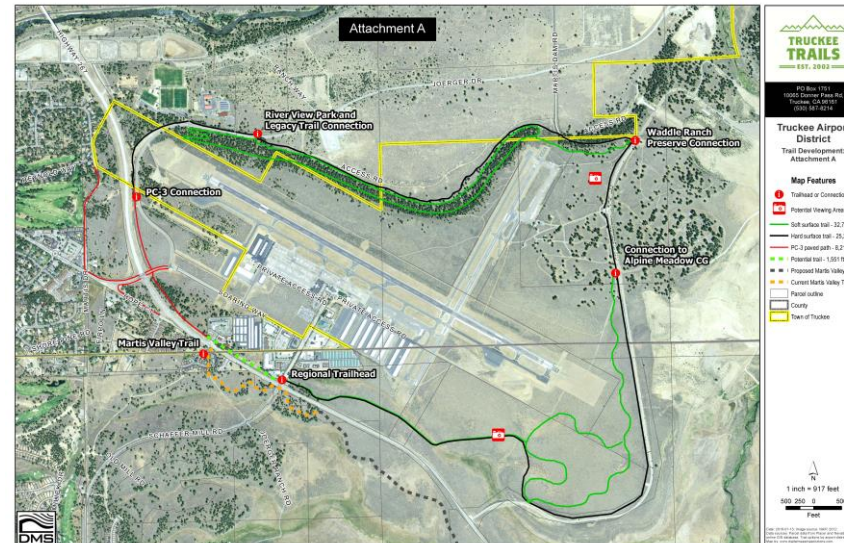

Airport Trails Network (Krueger & Golden)

Description:

This project is the second phase of the District Trails Masterplan completed by ACAT in 2016. The existing masterplan provides a framework for next steps. Project highlights for Phase II include partnership building, funding sources, grant applications, and trail alignment. Potential partners include the Truckee Trails Foundation, Truckee River Watershed Council, and the Truckee Donner Land Trust.

Objective: Complete a brief phase II implementation plan and commence work on partnerships and funding.

Mission: This supports the ACAT mission by enhancing constituent access to open space and building access to existing trails for transportation purposes.

Project

Mountain Top Automated Weather Observation System (Fast & Golden)

Description:

This project involves placing a weather observation and reporting station atop a mountain peak near the airport. The system must be certified and supported by the National Weather Service and the FAA.

Objective: Provide weather data for pilots both in flight and during planning that supplements existing resources. The goal is to warn of potential hazardous weather prior to crossing the Sierra's.

Mission: This supports the ACAT mission by enhancing safety to the flying public as well as the community at large.

Project

Pilot Incentives (Polverari & Fast)

Description:

Project is designed to incentive pilots to thoroughly understand our noise abatement programs and also flying repetitive touch and go operations here at KTRK.

Objective: Reduce the number of training and or repetitive flights to reduce community annoyance.

Increase pilot understanding of District procedures designed to reduce annoyance.

Mission: This supports the ACAT mission by reducing aircraft annoyance.

Project

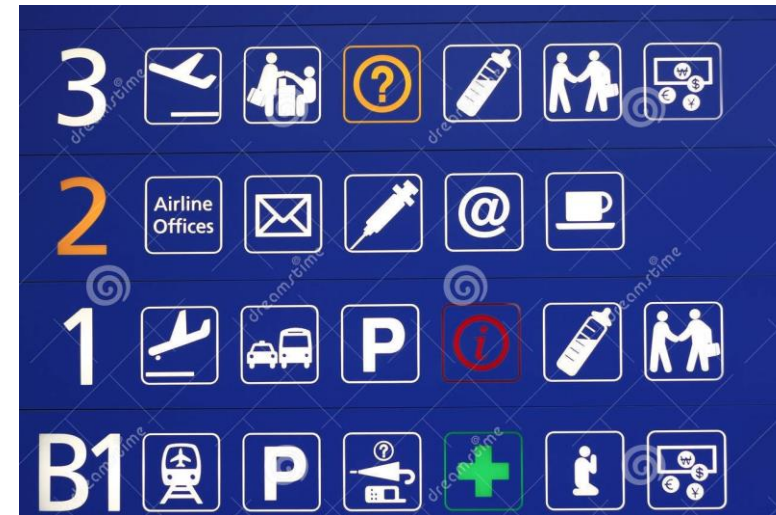

Pilot Messaging (Fast & Krueger)

Description:

This project is designed to unify and standardize all of the desperate pilot information related to outreach and annoyance reduction. From kiosks, to signs, print, website, and e-blast this project will take a close look at the messaging and unification of design principals, delivery, and message.

Objective: More clearly state the annoyance reduction goals of the airport to the pilot community. Gain better compliance with procedures while reducing community annoyance.

Mission: This supports the ACAT mission by reducing aircraft annoyance.

Project

Non Aeronautical Land Use (Rohlf & Polverari)

Description:

The project involves two ACAT members joining the Board's ad-hoc committee discussing the future plans for District lands designated as non-aeronautical.

Purpose: Provide benefit for the community through a detailed and well thought general conceptual plan for the non-aero land use ultimately culminating in a Board recommendation and or periodic updates.

Mission: This supports the ACAT mission by enhancing the airports benefit to the community at large through the use of public lands.
