

Transit Center Relocation

Notes from Project Advisory Committee meeting 2/28/19

Sustainable Community Grant from Cal Trans for planning purposes only.

Currently 51,000 one-way passenger trips annually. Relocation Plan would include the projected need for the capability of 383,000 one-way passenger trips annually.

Criteria for the needed area for this project is between 1.25-1.5 acres, dependent on structures (indoor, heated etc.), passenger conveniences (bike racks, charge stations, etc), and bus parking configuration.

5 places being looked at now:

1. CHP near BofA. State is likely to sell this 1.67 piece of property. Town of Truckee will have first rights to acquire.
2. Airport Property across the street from Town. 1.7 acres
3. Rail Yard. Multiple options in the track turn around area, 4.7 acres that can incorporate train station and downtown.
4. Existing Depot downtown. 1.0 acres.
5. Existing Depot downtown expanding across the tracks.

Suggestions requested for other site possibilities included:

1. 10 acres at Crossroads (Save mart/CVS)
2. New Rec Center

Some questions that are important to think about:

1. Do bus stations and train station have to be in the same spot?
2. Does transit center have to be downtown?
3. Are we including park and ride in this discussion.
4. Does the transit station have to be one place or multiple that connect?
