C. The return on the District's investment portfolio expressed as an annual percentage rate

For this quarter end, the return on the portfolio is 2.195% (annualized). This is calculated based on the LAIF rate for this quarter and assumes the CDs will be held until maturity.

D. The weighted average maturity of the District's portfolio.

The portfolio's maturities can be broken down as follows:

| Policy Instruction 308 | | |
|--------------------------|------------------------------|----------|
| Maturity Range | Suggested % | Actual % |
| One day to 180 days | 10% to 50% | 3.63% |
| 181 days to 360 days | 10% to 30% | 3.63% |
| One year to two years | 10% to 20% | 92.73% |
| Two years to three years | 0 to 20% | 0.00% |
| Over three years | Requires Board Authorization | |

The District has not been more aggressive in pursuing longer maturity investments because the return (yield) on a longer maturity investment is not sufficiently greater than the return earned with LAIF to justify the risk. The current weighted average maturity of the portfolio is 93.8 days.

E. A statement of compliance with investment policy.

The investment policy's objective is to protect the District's investable assets and generate income to the extent that prudent money management practices allow. Ideally, the District will invest in a variety of investment vehicles to increase the yield/return on investment received, while balancing the risk factors present. Although the suggested percentages of investments within the maturity ranges in the policy are not currently met, the weighted average maturity is within the stated limit and the District is in compliance with the policy.

F. A statement that the projected cash flow is adequate to meet expected obligations of the District over the next six months.

As a majority of funds are currently invested with LAIF and the weighted average maturity is 93.8 days; the projected cash flow is adequate to meet the expected obligations over the next six months.
