

General Manager's Report

Item 1 – Initial Assessment

Item 1 – Initial Assessment: After starting with the District on May 2, 2022, I've had the opportunity to meet the Truckee Tahoe Airport Team, Board Members, Customers, Community Members, and contract professionals supporting our programs. Overall, it is clear the Truckee Tahoe Airport District community should be pleased with the current state of the airport. And, with every organization there is always opportunity to grow and improve as we embrace a growth mindset to continuously understand our customer and community needs and along with industry and organization modernization opportunities. As you can read in the 2021 Audit Report in this month's board materials, the validation of fiscal processes and controls is strong at the District. As we undertake a new fiscal year budget process in the coming months, there is a tremendous opportunity to explore future priorities tied to modernization opportunities and a customer/community centric culture to align our organization priorities with our fiscal planning.

In the coming weeks, I will be focusing on the long-term Airport Capital Improvement Plan (ACIP), community communication methodology, Airport Master Plan update, internal maintenance, and customer engagement management system, along with reviewing existing policy instructions and how they are being implemented. Many of these topics are already underway or are being finalized and reviewed for implementation.
