

The #1 carbon data & sustainability platform

Your partner to reach net zero

The nZero platform provides automated, audit-ready emissions data in near real-time (NRT), bringing unparalleled transparency and accuracy across all three scopes.

We are the only end-to-end decarbonization solution that provides day-one value. We pair you with a dedicated Customer Success Team that guides and assists your sustainability journey, from data capture to reducing your impact.

nZero customer benefits

Reach net zero

Capture your most accurate and granular carbon footprint, allowing your team to confidently create carbon reduction roadmaps.

Get actionable insights

Near real-time, granular carbon data allows you to easily identify emission hot spots and optimize your consumption.

Communicate your journey

Communicate your sustainability goals and status confidently to your stakeholders, investors and customers, while avoiding greenwashing.

Disclose accurately

Built with the intention to align with the GHG Protocol. Reporting consistent with: TCFD, GRESB, CDP, SASB, and GRI.

Trusted by

nZero is a near real-time (NRT) carbon data & sustainability platform

Scope 1

Direct emissions: Mobile, stationary fugitive, and process

Automates your data collection and instantly calculate your carbon impacts.

Scope 2

Indirect emissions: Purchased electricity

Tracks thousands of data points on 24/7 energy use, providing you hourly insights.

Scope 3

Indirect emissions: Up and downstream activities

Looks upstream and downstream to calculate your carbon, water, and waste impacts.

Additional Scope 3 categories that we track include:

Employee business travel and commuting, water and waste, and many more. We pair you with a dedicated customer success team to guide you through every step of your sustainability journey.

FAST COMPANY

“Companies across the U.S. are using nZero’s data to better understand when and where their emissions are coming from, and adjusting their practices and building infrastructure in response”
(3/15/22)

“[nZero] is an organization that assists companies, communities, and other organizations in accurately assessing emissions data across all scopes of emissions.” *SEC climate disclosure proposal, pg 392 (3/21/22)*

THE WALL STREET JOURNAL

Forbes

“

Implementing nZero will enable us to efficiently and effectively baseline our ESG data and thus *enable us to measure the overall impact of our carbon reduction initiatives* while also providing customers with a transparent, real-time view into their usage patterns.

Craig McKesson
CCO of T5 Data Centers

“

The accuracy of data provided by nZero allows us to position the City ahead of schedule so we reach our target greenhouse gas reduction numbers. The investment in our partnership with nZero is *helping our climate goals become a reality for generations to come.*

Hillary Schieve
Mayor of Reno, Nevada
