

Aviation & Community Services Report

November, 2023

Director of Aviation

Runway 02/20 reopened on 16 Nov with a small ribbon cutting ceremony and first flight. Prior to the runway opening drone photography was captured of the glider port, sky dive area, and runway.

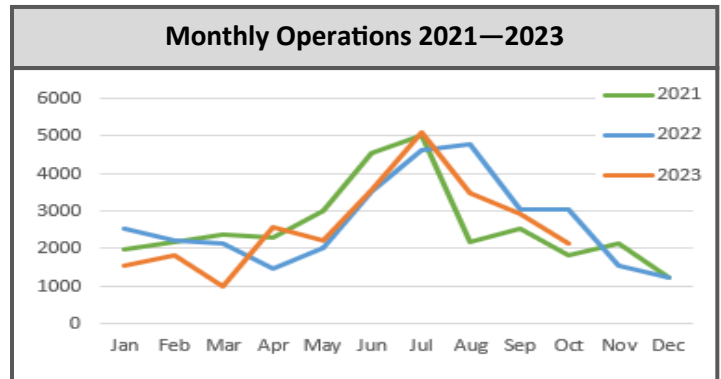

There was heavy community outreach this past month on Hangar Revitalization and the new Incentive programs, with direct contact to approximately 70 pilots and community members. All hangar tenants that sustained snow damage have been moved for the winter to other hangars.

On 13 Dec the FAA Safety Team will provide a presentation on accidents in the region, winter flying, and considerations for winter survival (this is an FAA WINGS credited course.)

Hangar Wait List

New applications remain on hold. Several tenants displaced based on structural damage from last winter (8 hangars unusable for aircraft).

	Inventory	Wait List
Executive Hangars	30	41
Super-T (48' door)	11	13
Large-T (44' door)	57	25
Regular-T	129	42
Total	227	121

Operations & Comments

October operations were down with jets and pistons seeing the largest decrease. YTD there are about 3,000 less operations including Gliders and Tow Planes. 15 operations occurred during quiet hours, eight were hangar tenants flying within their Fly Quiet windows. YTD there have been 148 operations between 10pm—7am, down from 192 in 2022.

18 households reported 40 comments in October including three new callers, down from 28 households last October. A Cessna 182 doing 12 touch and go's on Runway 29 generated comments by eight households. Outreach was made to the pilot after they had finished the training session.
