**Subject:** Questions arising from your Sept 13 pronouncement  
**Date:** Friday, September 20, 2024 9:37:21 PM

---

These questions are addressed to the Truckee Tahoe Airport District Board of Directors and their General Manager.

This quote is from your web page .....

**[RWY 02 Preferred Quiet Departure](#)**  
**Sep 13, 2024**

Our 100LL fuel truck recently got a new wrap to encourage and remind pilots to depart on Runway 02, our preferred "quiet departure" calm wind runway. Rwy 02 overflies open space so it provides the easiest way for a pilot to help maintain a noise sensitive departure.. Also, did you know that TRK sells full service 100LL for the same price as self-serve? This results in fewer aircraft engine starts, less time taxiing and significantly lower emissions. Click post heading for more info.

Questions 1....

What is the emissions profile of your 100LL fuel truck?

How does its fossil fuel consumption compare to that of various small aircraft taxiing? Many small aircraft, even in flight, do better mpg than the fuel truck.

If lead is your concern, when do you expect to be providing unleaded 100 octane fuel?

Questions 2 .....

Does angst about noise complaints trump safety?

Does noise angst trump money?

How much did the truck's wrap cost?

Have you examined the land beyond the end of Runway 2?

Have you considered the probability of aircraft occupants surviving an engine failure (and consequent arrival on the ground) during the time that it is impossible to stop on the tarmac?

The other three runways offer significantly better chance of surviving.

Sincerely,  
Mike Mayo

I don't see "written public comments" in the file list for your upcoming Airport District Board meeting.

[https://truckeeatahoeairport.com/board\\_meetings/367/attachments](https://truckeeatahoeairport.com/board_meetings/367/attachments)

Is that correct?

**Subject:** special meeting minutes  
**Date:** Monday, September 23, 2024 2:37:53 PM

---

Regarding the minutes from last month ....

[https://truckee Tahoe Airport.com/board\\_meetings/367/view\\_file?file=tab+05+-+august+28%2C+2024+special+meeting+minutes.pdf](https://truckee Tahoe Airport.com/board_meetings/367/view_file?file=tab+05+-+august+28%2C+2024+special+meeting+minutes.pdf)

I suggest you add a statement indicating Jeff Menasco's "extreme confidence" (pleasing to hear) that there will be no significant difficulty accommodating the practical needs for storing Soar Truckee's equipment over the Winter season.

Cheers,  
Mike
