July 10th
October 9th

4. Truckee North Tahoe Transportation Management Association – Larry Finney

TNT-TMA staff presented the results of the Winter 2026 Commuter Survey, which was conducted between March 14 and April 14, 2026. The 31-question survey received 99 responses from employees, all of whom work in North Lake Tahoe. Results showed that most respondents commute alone by personal vehicle, with weather and traffic identified as the biggest commuting challenges. Limited transit availability and efficiency were also common concerns. Among alternative transportation options, carpooling and public transit were viewed as the most appealing. Survey participants consistently highlighted the need for transportation that is fast, affordable, and reliable, expressed support for incentives that encourage transit, carpooling, and e-bike use, and indicated that more direct routes and increased service frequency would make public transit a more attractive option.

The next meeting is scheduled for August 6, 2026.
