

# Disadvantaged Business Enterprise Program

FY 2013-2015

For the

Truckee Tahoe Airport District

August 2012

**TRUCKEE TAHOE AIRPORT DISTRICT  
TRUCKEE, CALIFORNIA**

**FEDERAL AVIATION ADMINISTRATION (FAA) PROJECTS  
DISADVANTAGED BUSINESS ENTERPRISE (DBE) PROGRAM  
OVERALL ANNUAL DBE GOAL METHODOLOGY  
FOR  
FEDERAL FISCAL YEAR (FFY) 2013-2015**  
*For the period of October 1, 2012 through September 30, 2015*

**POLICY STATEMENT**

**Objectives/Policy Statement**

**Section 26.1, 26.23**

The Truckee Tahoe Airport District (TTAD) has established a Disadvantaged Business Enterprise (DBE) program in accordance with regulations of the U.S. Department of Transportation (USDOT), 49 CFR Part 26. The TTAD anticipates receiving Federal financial assistance from the FAA, and as a condition of receiving this assistance, TTAD has signed an assurance that it will comply with 49 CFR Part 26.

It is the policy of the TTAD to ensure that DBEs as defined in Part 26, have an equal opportunity to receive and participate in FAA-assisted contracts. It is also TTAD'S policy:

1. To ensure nondiscrimination in the award and administration of FAA-assisted contracts;
2. To create a level playing field on which DBEs can compete fairly for FAA-assisted contracts;
3. To ensure that the DBE Program is narrowly tailored in accordance with applicable law;
4. To ensure that only firms that fully meet 49 CFR Part 26 eligibility standards are permitted to participate as DBEs;
5. To help remove barriers to the participation of DBEs in FAA-assisted contracts;
6. To assist the development of firms that can compete successfully in the market place outside the DBE Program.

Kevin Bumen, Director of Aviation and Business Services, has been delegated as the DBE Liaison Officer (DBELO). In that capacity, he is responsible for implementing all aspects of the DBE program. Implementation of the DBE program is accorded the same priority as compliance with all other legal obligations incurred by the TTAD in its financial assistance agreements with the Department of Transportation.

The TTAD has disseminated this policy statement to all the components of our organization.

## OVERALL GOALS

### Amount of Goal

Truckee Tahoe Airport District's (TTAD) overall goal for Fiscal Years 2013-2015 (October 1, 2012 – September 30, 2015) is the following:

6.0% of FAA-assisted contracts will be expended with DBE contractors through race neutral means.

Given the amount of anticipated FAA-assisted contracts, which is \$2,756,250, the TTAD has set a goal of expending \$165,000 with DBEs during fiscal years 2013-2015. However, the actual dollar amount spent may be more or less depending on the successful bid(s) submitted and the actual DBE goal achieved at project closeout.

### Step 1: Methodology used to Calculate Overall Goal

#### **Section 26.45(c)**

The TTAD is located in both Placer and Nevada County; however, Placer County shall be deemed the operating location.

In order to set the overall goal, the TTAD first considered the contract opportunities anticipated for projects under consideration for FFY 2013-2015, which includes excavation, clearing and grubbing, drainage, crack and pavement sealing, electrical, paving, pavement marking, equipment procurement, and engineering related services. Additionally, based on TTAD's familiarity with construction and professional services procurement and practices within its operating jurisdiction as well as information contained in its bidders/proposers lists and pre-bid conference attendance history, the TTAD determined that contractors, both DBEs and non-DBEs, qualified to perform the services required for FFY 2013-2015 have traditionally come from within the El Dorado, Placer, Nevada, and Sacramento counties as well as the State of Nevada. For the projects being offered, the TTAD found no reason to research business patterns beyond the locations listed above. Therefore, the TTAD established its **market area** as follows:

**El Dorado County, California; Placer County, California; Nevada County, California; Sacramento County, California; and the State of Nevada**

Further, it should be noted that, while the areas listed above have been deemed the market area in the goal setting process, DBEs from outside the area will be given the same bid opportunities provided they are appropriately certified by the California/Nevada Department of Transportation, State of California/Nevada Unified Certification Program (UCP) or other state DOT certifying agencies.

Subsequent to confirming its market area, the TTAD researched the California and Nevada Department of Transportation's (Caltrans and NDOT) Disadvantaged Business Enterprise Database and chose to use them as the data source for the goal calculation numerator, which represents the number of ready, willing and able DBE firms within the market area as well as specific and applicable North American Industry Classification System (NAICS) codes that represent all possible contracting opportunities anticipated in FFY 2013-2015.

The Census Bureau's County Business Patterns Database (CBP) latest data for 2009 was selected to determine the total number of firms within the same NAICS codes and market area as those taken from the above directories, thus creating a denominator.

The contracting needs for work anticipated under FFY 2013-2015 funding include excavation, clearing and grubbing, drainage, crack and pavement sealing, electrical construction, paving and pavement marking, equipment procurement, and engineering related services. The analysis was confined to appropriate categories within the same NAICS codes and market areas, which were filtered from both data sources (DBE directories and the CBP database<sup>1</sup>):

NAICS Code <sup>1</sup>	Census Bureau Classification	Related Work Category
23711	Water, Sewer, and Pipeline Construction	Underground Construction
23731	Highway, Street and Bridge Construction	Asphalt Paving and Related Services
23799	All Other Heavy Construction	Heavy Construction
23811	Poured Concrete Foundation and Structure Contractors	Concrete Construction
23821	Electrical Contractors	Electrical
23891	Site Preparation Contractors	Excavation, Clearing and Grubbing
23899	All Other Specialty Trade Contractors	Fog Sealing
42381	Construction and Mining (except Oil Well) Machinery and Equipment Merchant Wholesalers	Procurement of Snow Removal Equipment
48422	Specialized Freight (Except Used Goods) Trucking, Local	Hauling
54133	Engineering Services	Engineering and Related Services
54137	Surveying and Mapping Services	Surveying and Mapping Services
54138	Testing Laboratories	Testing

Based on the TTAD's review of the County Business Pattern (CBP) and the Caltrans and NDOT DBE directory data pertaining to its market area, the total number of firms represented within the filtered categories was found to be as follows:

NAICS Code	Census Bureau Classification	CBP Total Firms (entire market area)
23711	Water, Sewer, and Pipeline Construction	156
23731	Highway, Street and Bridge Construction	99
23799	All Other Heavy Construction	46
23811	Poured Concrete Foundation and Structure Contractors	302
23821	Electrical Contractors	972
23891	Site Preparation Contractors	404
23899	All Other Specialty Trade Contractors	495
42381	Construction and Mining (except Oil Well) Machinery and Equipment Merchant Wholesalers	98
48422	Specialized Freight (Except Used Goods) Trucking, Local	252
54133	Engineering Services	938
54137	Surveying and Mapping Services	96
54138	Testing Laboratories	107
<b>TOTAL</b>		<b>3,965</b>

<sup>1</sup> Firms that are not characterized by the NAICS codes that appear in this document and those that do not reside within the market area illustrated above were not counted as part of the goal calculation date (numerator/denominator). For example, if a firm is certified by NDOT but is located in Florida, it is not included in the tally of DBE firms.

<sup>2</sup>NAICS Codes reflect the changes made by the 2007 NAICS Update. Refer to [www.census.gov](http://www.census.gov) for conversion information.

The total number of DBE firms represented in the market area was found as follows:

NAICS Code	Census Bureau Classification	DBE Total Firms (entire market area)
23711	Water, Sewer, and Pipeline Construction	4
23731	Highway, Street and Bridge Construction	15
23799	All Other Heavy Construction	0
23811	Poured Concrete	6
23821	Electrical Contractors	12
23891	Site Preparation Contractors	7
23899	All Other Specialty Trade Contractors	9
42381	Construction and Mining (except Oil Well) Machinery and Equipment Merchant Wholesalers	1
48422	Specialized Freight (Except Used Goods) Trucking	5
54133	Engineering Services	29
54137	Surveying and Mapping Services	4
54138	Testing Laboratories	2
<b>TOTAL</b>		<b>94</b>

This number makes the numerator in determining the base figure. Therefore, the last step is to determine the base figure for FFY 2013-2015.

To determine the relative availability of DBEs within the TTAD's market area, the TTAD divided the numerator, representing the ratio of ready, willing and able DBE firms, by the denominator, representing all firms (DBE and Non-DBEs) available for each of the work categories. Application of this formula yielded the following baseline information:

$$\frac{94 \text{ (Number of Ready, Willing and Able DBEs)}}{3,965 \text{ (Number of All Available Firms)}} = 2.37\% \text{ (Base Figure)}$$

*(including DBEs and non-DBEs)*

Based on the calculation above, the Step 1 base figure for FFY 2013-2015 is approximately 2.4%. This became the base figure of Step 1 utilized in proceeding to Step 2.

The next step is to prepare a table, as seen below, of FAA-assisted projects for the TTAD. The Projects have contracting and subcontracting opportunities and are anticipated to be awarded and/or expended within fiscal years 2013-2015:

PROJECT	Total Estimated Project Costs	Estimated Federal Dollar Share
<b>TRUCKEE-TAHOE AIRPORT DISTRICT 2013-2015 PROJECTS</b>		
Mill and Fill Apron Pavement	\$915,000	\$857,813
Apron Lighting Replacement	\$470,000	\$440,625
Purchase Snow Removal Equipment	\$880,000	\$825,000
Rehabilitate Pavement at Hangar Rows C, D, G, H	\$675,000	\$632,813
<b>TOTAL</b>	<b>\$2,940,000</b>	<b>\$2,756,250</b>

## **Step 2: Adjusting the Base Figure**

### **Section 26.45(d)**

After calculating a base figure representing the relative availability of DBEs, evidence was examined to determine what adjustment to the base figure should be made to reflect, as accurately as possible, the DBE participation one would expect in the absence of discrimination.

Evidence considered in making an adjustment to the Base Figure included the TTAD's Past DBE Goal Attainments/Commitments, Disparity Studies, and Other Evidence. A Summary of these considerations follows:

#### **A. Past DBE Goal Attainments**

The average use of DBEs for the TTAD over the past 3-years is approximately 0.00%. The TTAD does not wish to decrease the base figure obtained in step 1 and therefore no adjustments were made based on past DBE goal attainments.

#### **B. Evidence of Disparity Studies**

First, the TTAD researched the market area for any disparity studies that may have been recently conducted. Since the market area lies in both Nevada and California, both areas were reviewed. Research found that the California Department of Transportation finished conducting a disparity study on June 29, 2007 and can be found online at [www.caltrans.ca.gov/hq/bep/](http://www.caltrans.ca.gov/hq/bep/). This report published an overall annual DBE goal of 13.5% that can be achieved through neutral means. This number was comprised of data gathered from 2002 through April 2006.

In addition, the Nevada Department of Transportation has also released its own disparity study on June 20, 2007 and can be found at [www.nevadadbe.com](http://www.nevadadbe.com). This report published an overall annual DBE goal of 5.7% that can be achieved through neutral means. This number was comprised of data gathered from October 1999 through 2006.

The TTAD decided to determine the average of the two disparity study goals which will be used below to calculate the overall goal adjustment:

$$(5.7\% + 13.5\%) / 2 = 9.6\%$$

#### **C. Other Evidence**

The TTAD did not receive any anecdotal evidence nor is it aware of any other factors or adverse considerations that would have a material effect of DBEs availability within the TTAD market place or on DBEs ability to participate (meeting bonding, insurance and financial requirements) in the TTAD's FAA-assisted contracting program. Therefore, no further consideration toward goal adjustment was made this fiscal year. However, the TTAD will continue to explore and consider all available evidence that materially would affect the opportunities for DBEs to form, grow, and compete in the TTAD's FAA-assisted contracting program.

## **Overall Goal Adjustment**

Therefore, the TTAD has elected to make an upward adjustment to its Step 1 Base Figure based on the California and Nevada Department of Transportation disparity studies. The adjusted figure will be the average of the base figure in Step 1 of 2.4% and the average of the two disparity study goals above of 9.6%.

$$(2.4\% + 9.6\%) / 2 = 6.0\%$$

## **Conclusion**

TTAD's overall DBE goal for FFY 2013-2015 is 6.0% through race neutral means.

It is estimated that 100% of the federal funding will be provided to the NAICS categories listed in Step 1. Thus, the TTAD will expend 6.0% of the total \$2,756,250 FAA-assistance towards DBEs; which comes to a total of \$165,375 or approximately \$165,000.

## **PUBLIC PARTICIPATION AND FACILITATION**

In accordance with Public Participation Regulatory Requirements of 49 CFR Part 26, minority, women, local business chambers, and community organizations within the TTAD's market area will be provided an opportunity to review this goal analysis.

The TTAD has issued a Public Notice in general circulation media publishing the TTAD's Overall Annual DBE Goal for FFY 2013-2015 FAA-assisted contracts. Such notice will inform the public that the proposed goal and its rationale is available for inspection at the Truckee Tahoe Airport during normal business hours for 30 days following the date of the Public Notice and that the TTAD will accept comments on the goal analysis for 45 days from the date of the Public Notice. Results of the public participation process will be incorporated as required into the TTAD's Overall Annual DBE Goal established for FFY 2013-2015.

## **Section 26.39 Small Business Element & Participation**

### **Part I. Policy Objective**

In response to regulatory requirement 49 CFR Part 26.39 Final Rule issued on January 28, 2011, TTAD will begin to implement a Small Business Element into the existing DBE program to facilitate and foster competition by small business concerns by eliminating obstacles for their participation.

Recognizing that DBE's are small businesses, it is logical the DBE program provisions that help small businesses can also help DBE's. By facilitating participation for small businesses, recipients can possibly make more DBE participation, and subsequent participation by additional DBE firms. The DOT believes that "a program element that pulls together the various ways that a recipient reaches out to small businesses and make it easier for them to compete for DOT-assisted contracts will foster the objectives of the DBE program."

## **Part II. Non-Discrimination**

TTAD will not discriminate on the basis of race, color, national origin, or sex in FAA-assisted contracts and will remove all barriers and obstacles for small business participation. Fostering small business participation will be done through race-neutral methods.

## **Part III. Small Business Definition**

Small business must meet the definitions specified in Section 3 of the Small Business Act and the Small Business Administration (SBA) regulations implementing it (13 CFR Part 121). A small business is a business that is independently owned and operated, is organized for profit, and is not dominant in its field. Depending on the industry, size standard eligibility is based on the average number of employees for the preceding twelve months or on sales volume averaged over a three-year period.

## **Part IV. Small Business Verification**

Since California's Unified Certification Program (UCP) currently does not certify small businesses, TTAD will verify small businesses using the SBA database and/or other state/local certification programs, if any, so that small businesses will be considered as eligible for inclusion under this program. TTAD will not establish its own directory.

## **Part V. Scope of Program**

Since California's UCP currently does not certify small businesses, establishing a goal percentage based on available small businesses will not be performed for this element.

Therefore, TTAD will meet its objectives using a combination of the following methods and strategies:

1. Make RFPs/solicitations more attractive to small businesses;
2. Requiring prime contractors to provide subcontracting opportunities of a size that small businesses, including DBE's, can reasonably perform, rather than self-performing all the work involved;
3. Conduct regular reviews of upcoming projects to assess opportunities for unbundling; and
4. Encouraging DBE's and small businesses to attend the pre-solicitation meetings.

## **Part VI. Tracking SBE Participation**

Although there are no reporting requirements for the use of small businesses, upon completion of each FAA-assisted contract, TTAD will document the use of small businesses in the final construction report.

## **Part VII. Assurances**

TTAD makes the following assurances:

1. The DBE Program, including its small business element is not prohibited by state law;
2. Certified DBE's that meet the size criteria established under the DBE Program are presumptively eligible to participate in the small business element of the DBE Program;
3. There are no geographic or local preferences or limitations imposed on FAA-assisted contracts and the DBE Program is open to small businesses regardless of their location;
4. There are no limits on the number of contracts awarded to firms participating in the DBE Program;
5. Reasonable effort will be made to avoid creating barriers to the use of new, emerging, or untried businesses; and
6. Aggressive steps will be taken to encourage those minority and women owned firms participating in the small business element of the DBE Program that are eligible for DBE certification to become certified.

# **APPENDIX**

The following DBE firms were identified from the Nevada DBE Program to be ready, willing and able to perform work within the market area:

PUBLIC NOTICE  
TRUCKEE TAHOE AIRPORT  
2013-2015 DBE PROGRAM

The Truckee Tahoe Airport District has established a Disadvantaged Business Enterprise (DBE) Program in accordance with regulations of the U.S. Department of Transportation, 49 CFR Part 26.

The Truckee Tahoe Airport District has established a goal of 6.0% of the Federal financial assistance it will receive for improvements to the Truckee Tahoe Airport. The Truckee Tahoe Airport District estimates it will meet this entire goal through 100% race neutral means.

The DBE Program and the rationale used in developing the goal are available for review in the Airport Manager's office at the Truckee Tahoe Airport located at 10356 Truckee Airport Road, Truckee, CA 96161. The DBE Program will be available for review for 30 days following the date of this publication.

The Truckee Tahoe Airport District will take comments on the DBE Program and rationale for 45days following the date of this publication. Comments should be sent to the Airport Manager at the address listed above.
