Royal Electric Company
8481 Carbide Ct.
Sacramento, CA 95828

Subject: Contract No. 2276-1 Reconstruct Runway 7R/25L, Associated Taxiways, and
Install Perimeter Duct Bank Segment 4
Letter of Reference

To Whom It May Concern:

I would like to express my appreciation of Royal Electric's participation in successful completion of the subject project. Work by Royal Electric was performed safely without any lost time accidents, with exceptional quality, always completed right the first time, completed on budget, and all change order pricing was very fair.

The professionalism and extent of airfield electrical experience of the project management, supervision and craft was remarkable and undoubtedly lead to the success of this project.

Royal Electric completed work on the project earlier than required. The project had stringent time constraints, complex interfaces, and close coordination required with airport operations and the FAA to keep the remainder of the airfield operational while contract work was performed.

I would have no hesitation recommending Royal Electric for other similar work and hope to have to opportunity to work with you again in the future. Please feel free to contact me at (702) 261-3935 if you would like to discuss Royal Electric's outstanding performance.

Very truly yours,

Subject: Great Electrical Contractor

All:

In today's world the old adage "it's hard to find good help" seemingly is getting more difficult. I am here to make it easier. As I have recently finished RE'ing a mid-sized electrical job at Las Vegas (LAS) I had the pleasure to work with not only a great company but truly quality people.

Royal Electric Company is a 200-300 employee company from Sacramento CA that we contracted to do work at LAS. I worked closely with superintendent Chris Gurd and Leo Vellutini (the owner's son) at the site. I met approx 8 of their employees during the project and was very impressed at the quality and professionalism they all exuded. This company is very familiar with airport type work and extremely safety conscious-yes I said EXTREMELY!!! They think safety first, it's not just a saying it is a way of life. I never had to mention to wear PPE to any of them or how to conduct business on an AOA. And with this particular project we were faced with temps of 105-110 each day. They took extra precautions to stay cool and hydrated. They were always timely and had a "get it done" attitude for the whole project. Their quality of work was outstanding and I even joked with Chris that I am a perfectionist and he out-perfected me!!! The project went smooth and the CAI was a breeze.

I would recommend this company to anyone who needed a great electrical contractor. Although they are based in CA they will travel anywhere to the job.

Their info is as follows.

Royal Electric Company

8481 Carbide Court

Sacramento, CA 95828

Letter of Recommendation

I would like to express my appreciation to Royal Southwest Electric Company for their interest in my Runway upgrade project that lead them to submit a proposal to construct the electrical system on my new airfield. The coordination of this complicated project was critical to the overall work schedule and the experience, leadership, and dedication to this project by Royal Southwest was key in keeping the work progressing on schedule.

When two major unforeseen conditions were discovered during construction that threatened to stop this project mid-stream, Royal Southwest's ability to manage change, develop several innovative solutions, and guide our project to workable solutions instead of issuing claims for compensation to resolve the issues was invaluable and impressive. Without Royal Southwest's constant manipulation of each critical milestone we could not have stayed schedule and the runway would not have been reconstructed this year.

On behalf of everyone at Garfield County, we wish to recognize Royal Southwest for the outstanding work they preformed and congratulate the entire crew for the on schedule work performed at the Garfield County Regional Airport.

Sincerely,

Brian Condie C.M.
Airport Director
Garfield County Regional Airport

Customer Reviews & Quotes

"The partnership between Travis Air Force Base, ROICC Travis and Royal Electric field personnel is what made the project a success. There is a strong commitment in providing a quality facility within budget and on time"

- Carrie Campana, Contracting Officer
Dept. of the Navy ROICC regarding the Travis AFB
Replace Airfield Electrical Building Project.

"Royal Electric was an integral part of the contract team. Actively participated in monthly partnering meetings...[as a] major subcontractor with excellent coordination with the prime contractor...The client [was] very pleased with the quality of Royal's work...Royal's close coordination with flight operations were maintained throughout the project with minimal interruption...We received a quality product. Royal Electric was a significant partner on this project"

- Ellis Pope, Contract Specialist
U.S. Army Corp of Engineers regarding the Los
Alamitos Airfield Electrical Distribution and Lighting
System Project

"[As] a second tier sub, Royal Electric was actively involved in all processes...Royal Electric took pride in their work and worked diligently....Royal Electric worked around the National Guard's schedule and requirements....They were an integral part of our team....We experienced numerous problems that were resolved quickly and easily....We would definitely use Royal again"

- Sheri Bashaw, Contract Specialist
CA Army National Guard regarding the Los Alamitos
Airfield Electrical Distribution and Lighting System
Project

"Top notch staff with attention to detail on customer satisfaction, safety, and quality of work. Change order work was performed timely and at a fair cost. Royal Electric was outstanding at planning and executing the work and always had a contingency plan ready"

- Pete Ryan, Authorized Representative
McCarran International Airport regarding the
Reconstruct Runway 7R/25L, Associated Taxiways,
and Install Perimeter Duct Bank Segment 4 Project

RE: Royal Electric

To Whom It May Concern,

I have had the pleasure of working with Royal Electric Company (REC) on a very high profile and exciting Project. Over the span of one (1) year, I had the opportunity to interact with Royal Electric and its great Managers and Superintendents. On this specific project, the scheduling and management that REC provided was second to none. REC has a CAN and WILL DO mentality that was vital in our success of completing a \$60 Million Runway Reconstruction Project early and within budget. It was Royal's attitude and teamwork that made a very complex job into one of ease.

I would highly recommend Royal Electric for your next Project. It is for the above reasons the LVPC has chosen Royal Electric to be a partner on a Design Build Job that we are pursuing. Should you or your associates have questions or require additional information, please feel free to contact me at 702-251-5800 or on my cell phone at 702-353-4308.

Sincerely,
LAS VEGAS PAVING CORP.
