

Seminar Series

San Francisco Class B Airspace: A Flight From Truckee to the Bay Area

Join us in Truckee for another edition of the Fly Safe Seminar Series. This month, experienced pilots Michael Golden and Leigh Golden will dive into what you should know for a trip into the San Francisco Class B Airspace. The two will focus on safe operations into and out of San Carlos (KSQL) and will cover smart flight planning for the mountain portion of the route. They will also discuss weather hazards, visual reporting points, departure procedures and how to request and fly the "Bay Tour." With thousands of landings at KSQL and other Bay Area airports, Michael and Leigh will bring a wealth of knowledge to pilots who may be nervous flying in the busy Class B airspace.

About The Speakers

Michael Golden is an instrument rated pilot with thousands of hours of flight time and countless trips into and out of the San Francisco Class B. Leigh Golden holds an ATP rating as well as an AMP/IA. His career includes flying for the airlines as well as corporate flying in King Air's, MU2's and Lear Jets.
