

# FLY SAFE

## *Pilot Proficiency Seminar*

### Rescued - A Survivor's Story

Come hear the firsthand story of a tragic plane crash and astonishing rescue in the winter of 1997. Flying right seat in a Cessna 402C out of Reno, the recent college graduate, and flight instructor, Franco Salluce recalls what happened and how he survived an unfortunate afternoon on a Sierra Nevada mountainside. Also joining us will be a representative from the Civil Air Patrol's National Radar Analysis Team (NRAT) who will share what they do to help find missing pilots.

### About The Speakers

Franco Salluce is a CFI and ATP-rated corporate pilot with over 30 years of flying experience. He learned to fly in the Northern California foothills and currently flies large-cabin corporate jets all over the world. The Civil Air Patrol-NRAT formed in 2009 to significantly shorten the 'crash-to-rescue' chain.
