So airport staff often get asked, how many flight operations does the Truckee Tahoe Airport get in a year, and what is the makeup of the aircraft type using KTRK?

In calendar year ending 2016 your Truckee Tahoe Airport recorded 32,524 flight operations. The aviation industry (FAA) considers a take-off as one operation and a landing is counted as another separate operation.

There are 11 automated cameras strategically spread around the KTRK airfield that capture every aircraft arrival and departure. The system also captures each aircraft tail number allowing identification of the aircraft type.

In 2016 the make up of the 32,524 operations were recorded as:

14,262 Piston Single Engine  
1,205 Piston Twin Engine  
6,413 Turbo Prop  
918 Jet < 12,499 lbs MTOW (Max take off weight)  
1,331 Jet 12,500 - 19,999 lbs  
1,164 Jet 20,000 - 49,999 lbs  
261 Jet > 50,000 lbs  
1,190 Helicopter  
5,780 Glider
